ENDUROSHIELD®

EnduroShield® is an invisible glass treatment that seals the microscopic pores on the surface of glass to help prevent hard water from penetrating through the surface, which can reduce cleaning time by up to 90%.

REPELS SOAP SCUM & GRIME

Save time and money with EnduroShield®, the revolutionary, non-stick treatment that is ideal for shower glass. EnduroShield® glass treatment makes cleaning shower glass easy and repels soap scum, grime and dirt.

Untreated glass is porous and as a result absorbs mineral deposits and soap scum, making it more and more difficult to clean overtime. Shower glass is subject to mineral deposits from water, shampoo, soaps, body fats, and harsh scrubbing using toxic cleaners, causing the glass to discolor and develop irremovable staining.

EnduroShield® is an ultra-thin transparent glass coating that completely adheres to the surface and provides protection that will repel both water and oil based stains. Similar to a non-stick fry pan, cleaning is made easier using a mild detergent or white vinegar with a damp microfiber cloth. No longer is scrubbing with harsh toxic cleaners needed.

FEATURES

- EnduroShield® is a pre-installed, added value premium feature
- No special installation requirements for shower doors with EnduroShield® — installs like a normal door
- Crystal-clear treatment which does not change the color or gloss of the glass door
- Comes with a 10-year warranty - www.enduroshield.com

SAFETY

We maintain strict safety standards with all of our products.

SAFE OPERATION

- Frameless glass doors must be opened or closed slowly while maintaining control at all times.
- Seals and bumpers should not be removed for any reason.

SAFETY FEATURES

- Frameless glass doors are equipped with safety bumpers and polycarbonate seals to aid with water control and door safety.
- Engineered to prevent doors from “jumping off” of top track.

CARE & MAINTENANCE

SAFETY FEATURES

GLASS

- Use a clean, lint-free microfiber cloth or squeegee
- Use mild soap or non-ammonia based glass cleaner such as Sprayway

ALUMINUM HARDWARE

- Use mild soap or Sprayway glass cleaner

STAINLESS STEEL HARDWARE

- Use mild soap or stainless steel cleaner

POLYCARBONATE SEALS

- Use mild soap or Sprayway glass cleaner
- Avoid using bleach, ammonia, or any strong chemical, which will make the seals brittle and discolored

AVOID

- Using abrasive or soft-abrasive powders and liquids, bleach or bleach-based cleaners, steel wool or Teflon pads, razor blades and scrapers.
